

Let us help you put some money back in your pocket for shopping energy efficiently!
Members of Farmers' Electric Cooperative are eligible for the following rebates (specific guidelines must be met).
If you have any questions, or need more information concerning all the available rebates, please contact our
Energy Services Department at 800-927-5334, ext. 131.

Specific guideline details and the rebate submission process is available on our website: www.fec-co.com.

ADVANCED THERMOSTAT	\$50	Must be an ENERGY STAR® rated thermostat. Can be used with any type of heating and cooling system. For new construction or the replacement of an existing non ENERGY STAR® thermostat. Not to exceed 50% of the total cost. Limit of up to two (2) per Member address.
ROOM AIR CONDITIONERS	\$50	ENERGY STAR® rated (for new or replacement unit). Not to exceed 50% of the total cost. Limit one (1) per Member address.
ELECTRIC WATER HEATERS	\$50	For electric water heaters that meet Department of Energy standards at the time of manufacture. This rebate applies to new construction and the replacement of an existing electric water heater that is less than 0.90 efficiency or the replacement of a gas water heater. Instantaneous water heaters do not apply. Limit two (2) per Member address.
HEAT PUMP WATER HEATERS	up to \$500	The energy efficiency rating must meet ENERGY STAR® standards. For new construction, the rebate applies to the replacement of an existing electric heater that is less than 0.90 efficiency or the replacement of a gas water heater. Limit two (2) per Member address.
AIR SOURCE & MINI-SPLIT HEAT PUMPS	\$150/ton	ENERGY STAR® Plus 2 rated at 17.0 SEER <ul style="list-style-type: none"> • New home or building construction • Replacement of existing electric resistance heat/central air conditioning/air source heat pump • Supplemental heat must be controlled by an automatic thermostat
GEOHERMAL (GROUND SOURCE) HEAT PUMP	new \$750/ton replacement \$150/ton	ENERGY STAR® Plus 2 rated at 19.1EER <ul style="list-style-type: none"> • On new home or building construction • Replacement of electric resistance heat • Replacement of existing natural gas or propane heating system • Replacement of an existing central air conditioner or dual fuel heat pump • Any form of backup heat is allowed For the replacement of the indoor ground source heat pump unit only—no match required
